Are you involved. Hopefully so we get the revenue. Let's chat in asia - can't discuss over email.

I hope so. This is DQ's prop trade (don't tell CSAC). CSAC agreed to terms even though they don't get to pick the assets.

Subject: CSAC CDO Squared

Here's an engagement letter blacklined to our CSAC high-grade deal. Key terms:

\$700MM ABS CDO Squared (single-A and BBB rated assets)
CSAC gets 10bps senior fees
Citi gets 2% structuring fees, subject to change in Citi's sole discretion.
Citi takes gains/losses if Citi terminates or mutually terminates
CSAC takes losses if CSAC is bad (fraud...), doesn't buy 20% of the equity, or refuses to proceed.
Citi takes 100% risk on downgraded assets.
Citi gets last look on all liquidations.

Thanks for taking the time to talk about the CDO squared proposal earlier today. Given the refreshing experience we've had with your team in both the CLO and ABS CDO space, we're very keen to broaden the relationship to include this asset class.

As discussed, I'm attaching herewith a list of about 30 CDOs that are contemplated to be in the portfolio. This is a first cut, but should be good enough to give both parties an idea of whether or not a trade is feasible. Look forward to your early turnaround, we'd like to firm things up as soon as feasible.

Best,

Sohail Khan Director Global Structured Credit Products Citigroup Global Markets Inc. 212.723.6452 (work), 917.292.3627 (cell) , 212.202.4684 (fax), sohail.khan@citigroup.com

Attachments: CDO^2 deal summary.xls

FYI - Here is the latest structure. This assumes all single-A CDOs, but I'd recommend more BBBs. I'm thinking the president/constellation deals should be single-A and rest should be BBB. If ok, we'll restructure it. Let me know if you want to change the asset or liab spread assumptions.

Lastly, we'll rerun 2 structures. One structure with OC tests where all defaults happen in year 3 (b/c downgrades will hit then). A second structure without OC tests where defaults hit in year 5 (b/c defaults/pikking should occur about then). That will help us decide which deal to do. Shalabh - can you give us different liability spread for the liabilities with and without OC tests?

#### Brian

——Original Message—— From: Troszczynski, Marek [CIB-GFI] Sent: Tuesday, November 21, 2006 6:08 PM To: Quintin, Donald J [CIB-GFI] Cc: Stoker, Brian [CIB-GFI]

Subject: RE: Any luck in getting me the CSAC presentation today, thanks

#### Donald,

Here is a quick comparison between two structures for the CDO^2 trade.

The returns might now look great as the spreads on liabilities are pretty wide (per Shalabh). Let's discuss with Brian tomorrow when he gets in.

Thanks, Marek
